

PORTABLE SIGNATURE SURFACES **VPAD™**

The VPad™ signature surface is an intuitive electronic device which can perceive and embed a manual signature into a document. It is a monitor with an electronic pen which allows it to display both long and short **documents in their original form**. The user signs the surface just as one would use an ink pen to sign a piece of paper. **The VPad™ saves the company the need to use paper for legal communications, thereby saving possibly tens of thousands of dollars.**

VPAD™'S CHARACTERISTICS

- Receives the main biometric parameters of manual signatures.
- Handles documents and forms with several pages requiring numerous signatures.
- Includes signature collection that verifies correct completion of the form.
- Complies with international signature laws.
- 15" high resolution color screen

VP Sign

Receives documents created by a local app or central server.

Compatible with PKI encryption infrastructure.

Easy connection to the organizational information system.

STATIONARY AND PORTABLE SIGNATURE SURFACES

**WHAT
YOU SEE
IS WHAT
YOU
SIGN**

This is the right solution for the organization if:

The organization creates large quantities of documents signed by customers.

The organization seeks to free itself from the costs of printing, scanning, and archiving.

The organization wants to save time when having customers sign documents.

The organization wants to ensure that its paperwork is accurate.

**THE ELECTRONIC SIGNATURE
LAWS GIVE ELECTRONIC
SIGNATURES THE SAME VALIDITY
AS THE TRADITIONAL
INK-ON -PAPER SIGNATURE**

STATIONARY AND PORTABLE SIGNATURE SURFACES

Which type of organizations can benefit from ERP signature pads?

- Organizations that produce a large quantity of documents signed by customers.
- Organizations that want to save on printing, scanning, and archiving costs.
- Organizations that want to save time when having customers sign documents.
- Organizations that want to make sure that no document will get lost, and make sure their paperwork is accurate.
- Organizations that want to reduce the risk of being sued.
- Organizations that work with the general public.

CHANGE TO SIGNATURE PADS CONNECTED TO THE ERP AND SAVE SPACE AND TIME SPENT LOOKING FOR DOCUMENTS IN THE ARCHIVE. SEND EVERY SIGNED DOCUMENT DIRECTLY TO AN INTERNAL SYSTEM.

SmartPhone

Mini Tablet

A4 signature pad

MOBILE SIGNATURE PADS, TABLETS AND SMARTPHONES

Smart Phone

Mini Tablet

Instead of printing a copy of a delivery note, sending it back to the business after signature, risking errors or the loss of documents, and then filing the document - the mobile signature device **enables you to get the customer's signature and instantly and automatically file the document directly in the ERP, with no need for printing or manual filing!**

The delivery driver loads his smartphone with all the deliveries he is due to make that day. He gives the original (manual) delivery note to the customer while getting him to **sign the copy on the smartphone or tablet.**

**THE SIGNED
DOCUMENT
IS SENT
AUTOMATICALLY
TO THE ERP!**
